- Support on STB-purchase (for operators)
- Development of operational procedures
- Preparation of specifications
- Preparation of test-procedures
- Frequency/bit-allocation
- Implementation of interactive services
- CA-systems (especially Conax)

the person

ThorDig is a one-man company, which is operated by Jens Schjødt Thorsen, who has long experience and expert competence regarding distribution of digital TV and pay-TV.

The experience is highly achieved through a key position on technology at Canal Digital. Jens Schjødt Thorsen has been one of the main persons behind the development and implementation of the technology platform of Canal Digital: STB, encoding, muxing, SI, playout, contribution, Conditional Access, Mediahighway, MHP, contract negotiations with broadcasters, test-

procedures, frequency-allocation.

He has been a member of the technical module of Nordig from 1999 to the end of 2003.

Jens Schjødt Thorsen has been in the pay-TV business since its birth. From 1988 as Technical Manager in Dekoderselskabet, which handled customers for Kanal 2 and FilmNet. Later as Technical Manager for the Nordic countries in MultiChoice. He has been working with analogue as well as digital scrambling-systems from analogue PAL via D2-MAC to digital-TV.
